LAB 1: Using the MS-DOS Command Line

Objective

- To familiarize yourself with the MS-DOS commands.

Instructions

1. Please do the following exercises and for each question produce a screen shot of the command and the output.
2. Show your work to your TA.
3. Collect the screen shots in a PDF file and upload it on TEAMS before the end of the lab to get full marks.
4. Use the following file naming convention:

   LAB1_section_your-first-name_student-id

Note: 1 mark (out of 10) deducted per day late. 3 days late maximum.

Exercises

1. Get detailed information on a specific command.

2. List the content of a directory in wide format.

3. Rename file file1 to file2. You can use any file in the directory.

4. Do the following steps:

   (i) Make a new subdirectory named dir_y.

   (ii) Change to subdirectory dir_y.

5. Change your prompt to C**

6. Get the list of all installed programs.

7. Obtain the IP address of a website (other than UPM). Each of you should give a different website. No two students are the same.

8. Show the history of what you have done.
